TEST EVIDENCE

Visual evidence captured during execution

STEP 01

Click "Yuk Mulai!"

PASS

EXECUTION ASSESSMENT

Human-readable execution summary

Execution completed successfully

The smoke test completed successfully. The blu UAT application was launched through the Appium 2 mobile fixture, the configured Android object repository locator was resolved successfully, and the "Yuk Mulai!" interaction completed without failure.

CURRENT PHASE 1 COVERAGE

The current smoke test validates that Playwright can create the mobile fixture, connect through WebdriverIO to Appium 2, launch the blu UAT application, resolve the configured Android object repository locator, and execute the initial "Yuk Mulai!" interaction.

AUTOMATION STACK

REPORTING DIRECTION

This PDF provides the human-readable execution summary. The Playwright HTML report remains the detailed technical report for debugging, traces and test-level diagnostics.
