EXECUTION ASSESSMENT

Human-readable execution summary

Execution completed successfully

The smoke test completed successfully. The blu UAT application was launched through the Appium 2 mobile fixture and the configured mobile login flow completed successfully.

CURRENT PHASE 1 COVERAGE

The current smoke test validates the mobile fixture, WebdriverIO connection, Appium 2 driver, Android object repository, and the configured login flow.

REPORTING DIRECTION

This PDF provides the human-readable execution summary and step-by-step visual evidence. The Playwright HTML report remains the detailed technical report for debugging, traces and test-level diagnostics.
